Intel® IT Director

One Less Thing for Small Business to Worry About

Intel® IT Director leverages Intel® vPro™ technology to provide an easy dashboard-based, non-technical approach for managing small business PCs.

Intel® IT Director v1.0 includes:

- **Hardware and Software Asset Monitor** for PCs on the local network
- **USB Blocking** to prevent copying data to unauthorized devices
- **Hard Drive Backup and Restore** monitors presence of a backup application
- **Security Center** for monitoring Windows Security Center settings
- **Power-on Monitor** for tracking when computers on the network are powered up
- **Hard Drive Free Space Monitor** warns of PCs with low hard drive space
- **Set User Privileges** feature for easy configuring of PCs for non-technical small office managers

Add Value for Your Small Business Customers without Adding Any Cost
