

The Intelligent Transformation of XR Theme Park Management

Sky Limit Entertainment (SoReal) is committed to creating the ultimate immersive experience and integrating XR content creation with comprehensive digital solutions and product implementation. Through the implementation of a smart operations and management system based on Intel architecture, SoReal has improved VR game, VR video, VR tourism, and other XR entertainment consumer experiences while realizing agile and efficient operations and management. With a solution based on the Intel® Video AI Box, SoReal provides strong computing power for applications such as gate access verification, AI crowd analysis, and LED screens. The solution has become a key part of smart operations and management systems, and improves the entertainment experience of consumers through convenient and rapid processes.

“Through cooperation with companies such as Intel, we have constructed high-performance XR park management solution and provided base computing power support for the smart operation and management of XR theme parks.”
